ABOUT SOCCER 5[®] X PERIENCE

Soccer 5[®] X perience has been uniquely designed, developed and implemented for players of all ages and abilities to improve their ability whilst tracking their progress and enjoying all that Soccer 5[®] offers by way of industry leading small sided soccer facilities on 5G pitches, merged with advanced soccer technologies, and delivered by passionate experienced coaches and developers

ESA delivers cutting-edge training technology to some of the world's best clubs and academies. ESA has empowered Soccer 5[®] coaches with data, allowing them to focus on the specific attributes required to enhance performance on the pitch.

SOCCER 5[®] ACADEMY

LEARN

We want our players, coaches, parents, and staff to always be students of the game and understand that they can learn something new everyday.

IMPROVE

We want our players, coaches, parents, and staff to always try their best and strive to become better at what they do.

ENJOY

We want our players, coaches, parents, and staff to love the game, no matter what their position is on or off the field.

TECH STACK

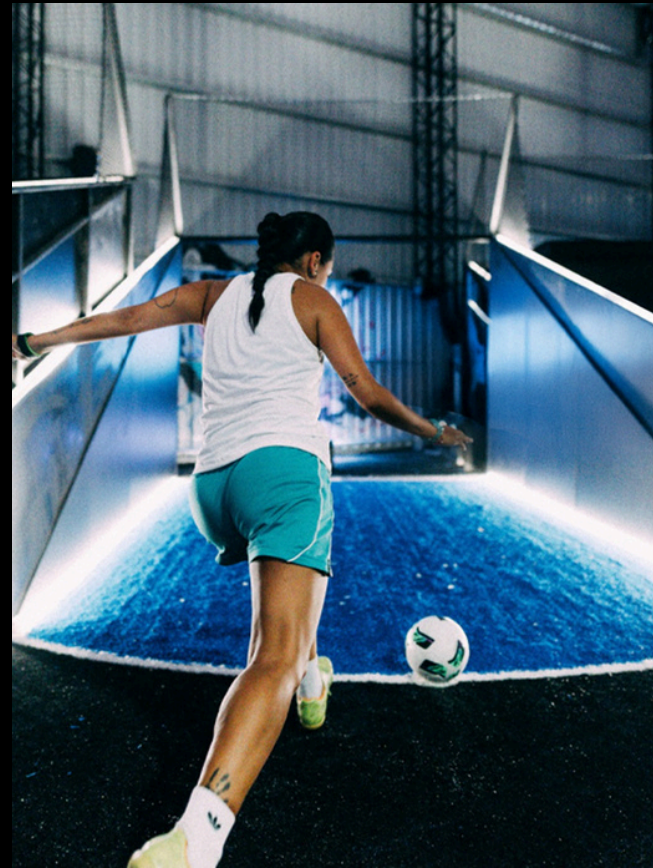

WRISTBAND SYSTEM & SOCCER 5[®] APP

Designed and developed cutting-edge web and mobile applications aimed at improving the user experience and enabling users to interact with their products in a more efficient way. Our applications have been engineered to provide comprehensive data and statistics to users.

PRECISION GOAL

Helps players refine shooting accuracy, first-touch control, and teamwork through realistic, high-pressure drills. Whether training solo or in teams, it replicates real match scenarios, making it ideal for set-piece practice. It can even simulate the movement of a professional goalkeeper, creating a dynamic and challenging training experience.

SPEED RADAR

Our gate module simulates realistic dribbling and movement off-the-ball and speed. A Beam Breaker is fitted, which players must pass through with or without the ball.

ICON

The ICON's circular design generates repetition, which produces the same amount of touches in a minute as you would attain in a 90-minute match. It provides a competitive environment for players to challenge themselves, working on a whole range of technical, physical and mental attributes.

SPRINT LANE

Our sprint lane simulates more realistic dribbling, and movement off-the-ball. A Beam Breaker is fitted at waist height, which players must pass through with or without the ball to satisfy the target. Sprint lane also offers the ability to track players times over 20 yards/agility runs, etc.

TECHNICAL JOURNEY

DIGITAL/SOCCER 5[®] APP

Our APP makes it easy for coaches to spot problem areas, suggest appropriate training, and track improvements over time. ESA kit introduces a fresh, competitive element to training, boosting player engagement, and sharpening their hunger to improve. A player receives a score at the end of each drill based on their performance, which is then added to their profile. Players compete with themselves and each other, and can even measure their scores against top pros.

OUR TRAINERS

Our trainers know the system and have been trained by both Soccer 5[®] and ESA and operates on a player-centric philosophy, which focuses on the development and experience of each player. We strive to be the best developmental soccer program in the US by implementing our core values, code of ethics, concise and current coaching education every day.

TECHNOLOGY DRIVEN

Our data hub allows coaches to benchmark a player's ability across a range of specialized training programs. ESA drills are professionally designed to develop specific attributes in players through repetition, from physical skills like close control and passing accuracy, through to psychological qualities like composure and vision.

FACILITIES RENTAL

TRAINING

You can reserve one of our pitches for specialized or group training.

CORPORATE

Team building, tournament, or social fun tech driven? Various packages are available.

EDUCATION
